profile

As a final year engineering student, I am deeply passionate about Computer Science and dedicated to honing my skills in developing reliable software and mastering low-level programming. My journey has led me to explore the exciting realm of full-stack web development, where I am actively engaged in creating innovative projects that challenge and elevate my abilities as a programmer.

work Experience

12th Grade Computer Science Teacher

Oxygen Academy

October 2020 - June 2022

- Taught various subjects including Python, C/Cpp, DBMS
- Taught paradigms and practices to solve programming problems
- Organized curated projects for students to practice and learn
- Pursued ongoing academic education and tended to all academic and mentoring responsibilities simultaneously.

projects

- **Clox:** A fully functional dynamically typed programming language implementation on C
- **Chat-Application:** Full-stack web chat app developed on bleeding edge MERN stack, it is more like discord
- **Sudoku-Splver:** A web based sudoku puzzle solver which helps you to solve the randomly generated puzzle by giving interactive hints which educate you about various hints used in solving the puzzle
- and many more projects beautifully showcased in **portfolio**
